

FOR CONSULTING TEAMS AND LARGE ORGANIZATIONS

The workflow your client still runs in Excel. We build the software to fix it.

Your client's team still spends the week exporting, reconciling, re-keying, emailing for approval, rebuilding the same report and chasing the owner of a number.

AI looks easy to try. Making it useful inside a large company is the hard part. Show us the workflow. We build the software around the systems they already run.

WHAT 3FOLD DOES

One workflow at a time. We learn how it runs today, redesign it, connect the team's tools and build the missing software.

CONNECTION | RULE | SCHEDULED CHECK | DATA | VIEW | ALERT | AI STEP

We use AI where it makes sense. We use normal software where normal software makes sense. We care about the business result. A build with no AI step is a normal result.

THE WORK IT TAKES OFF THE TEAM

- A reconciliation rebuilt in Excel every month
- A tracker three teams update by hand
- An approval that lives in email
- A weekly report built from exports
- A deadline watch in one person's head

Built around SAP, Salesforce, Workday and Excel. No new system to learn.

Operations data only. We never ask for patient records.

\$5,000

 STANDARD BUILD

\$2,500 to start | \$2,500 at acceptance

A standard build covers one workflow and up to two or three of the client's systems.

ONE TIME. NO SUBSCRIPTION. NO SALES CALL.

For your first standard 3Fold build. Larger or additional builds are scoped separately.

WHO BUILDS IT

Kent Shi

Founder of 3Fold. Harvard Kennedy School '22.

He scopes and builds every 3Fold project.

HOW WE WORK WITH CONSULTING TEAMS

ON YOUR CLIENT PROJECT

- You keep the client relationship.
- Written scope you can forward. Fixed price per build.
- Delivered inside your engagement or straight to the client.
- Documentation and a handoff to a named owner.

TOO SMALL FOR YOUR FIRM

- Send the client to 3fold.me/start or forward this page.
- The client buys in writing. Nobody has to meet.

SECURITY AND DATA

- Encrypted in transit and at rest. Private file storage with signed links.
- Model provider: Anthropic. We never use your data to train anything.
- A person approves every outside message. Operations data only.
